INTRODUCTION

In this section please:

Provide a summary of your project in up to 500 words. Include its relevance to integrated care, the aims of the Institute and the nature of the intended partnership (within the organisation or with external organisations).

Outline any background information including policy, practice or research literature that explains the problem in greater depth. 500 words

What are the main aims of the project? 250 words

METHOD

What research approach or methods do you plan to use?

Tell us what you plan to do and who will primarily be responsible for key tasks involved. Include the stages of the project and anticipated timeline in a Gantt chart (this can be emailed separately).

Are there any ethical issues involved in this project?

If yes, please describe the ethical issues that may arise in your project

Where will you seek approval?

Are other organisations involved in the project?

If yes, please list them

How will this project improve communications between the organisations involved?

Are patients / service users involved in the project?

If yes, please let us know how they will be involved. If no, please explain why patients / service users aren't involved

Will the project improve patient pathways, outcomes or experiences?

If yes, please state how

RESULTS

What do you hope the project will achieve?

What are your plans for evaluation?

DISSEMINATION

What publications will result from the project and where will they be published?

In what other ways will you disseminate the project?

COSTS

Please give a breakdown of the requested costs

--

Has your Finance Office (or equivalent) approved these costs?

Is there any additional expertise that you require that the Institute could support you with?
